

# Michela Negro

---

*Curriculum Vitae - last updated: Jan 2026*

---

## Personal Details

E-mail: [michelanegro@lsu.edu](mailto:michelanegro@lsu.edu)

Web-page: <https://nmik.github.io>

ORCID: 0000-0002-6548-5622

---

## Education and previous positions

- Sept. 2009 – **Bachelor Degree in Physics**, *University of Torino*, Grade: 110/110  
June. 2012 Supervisors: Prof. Silvano Massaglia (Univ. of Torino), and Dr. Emanuele Tracino (Thales Alenia Space - Torino)
- Sept. 2012 – **Master degree in Nuclear and Sub-nuclear Physics**, *University of Torino*  
June. 2014 (IT), Grade: 110/110 with honors  
Supervisors: Dr. Luca Latronico (INFN of Torino)
- Oct. 2015 – **Ph.D. in Physics and Astrophysics**, *University of Torino (IT)*  
Feb. 2019 Supervisors: Dr. Luca Latronico (INFN of Torino) and Prof. Nicolao Fornengo (Univ. of Torino) – Title obtained on January 15 2019.
- Feb. 2019 – **Postdoctoral position in Astroparticle Physics**, *University of Torino*,  
Sept. 2019 *Italy*.
- Sept. 2019 – **Postdoctoral position in Astroparticle Physics**, *NASA Goddard Space*  
Sept. 2022 *Flight Center (CRESSTII/UMBC)*.

---

## Employment

### Current

- Aug. 2023 – **Assistant Professor**, *Louisiana State University*  
now Main research field: “Multidiagnostic high-energy astrophysics”

### Past

- Sept. 2022 – **Assistant Research Scientist**, *At NASA Goddard Space Flight Center*,  
August 2023 *through CRESST II (Center for Research and Exploration in Space Science and Technology II) in co-affiliation to University of Maryland Baltimore County*.
- Oct. 2014 – **Employed at Thales Alenia Space**, *Torino, Italy*, Main research field:  
Sept. 2015 “ROSSINI2”: *an ESA commissioned study for new material for radiation shielding in Space*

### Current Appointments

- Jul. 2025 – **Member of the XRISM Users Group (JAXA-NASA Space Mission)**  
Jan. 2028

Jan. 2025 – **Member at Large of the AAS Division of High Energy Astrophysics**  
 Jan. 2028 **(HEAD).**

Mar. 2024 – **Analysis Coordinator for the Fermi-LAT Collaboration.**  
 Mar. 2026

Apr. 2023 – **Secretary/Treasurer of the APS Division of Astrophysics (DAP).**  
 Mar. 2027

## Grants (approximate total: \$1.1M)

- Submitted 2026 NASA - Astrophysics Data Analysis (ADAP) Project Title: Advancing Spectro-Imaging Science Through Spatial Template Modeling for X-ray astronomy; PI: Adrien Picquenot (MN's Postdoc at LSU); Co-PI: Michela Negro. **Pending Grant total: ~\$200k.**
- Submitted 2025 NSF - Astronomy and Astrophysics Research Grants (AAG) Project Title: Advancing Spectro-Imaging Science Through Spatially Constrained Template Modeling for Optical and Radio science; PI: Adrien Picquenot (MN's Postdoc at LSU); Co-PI: Michela Negro. **Pending Grant total: ~\$200k.**
- 2025 PI of a NASA NASA Fermi Guest Investigator Program (Cycle 18th) Project Title: – Grant total: Progenitor-Based Classification of Gamma-Ray Bursts with Machine Learning - **Grant total: ~\$80k.**
- 2025 Co-I on NSF 24-540: Established Program to Stimulate Competitive Research (EPSCoR): Workshop Opportunities Project Title: WP-SEEDS: A Workshop of the Partnership for Southern Excellence and Education in Data Science – **Grant total: ~\$100k.**
- 2023 Principal Investigator (PI) of a 3-year proposal selected by NASA's Astrophysics Data Analysis Program (ADAP) Project Title: IXPE sources: a quick-look database and high-level data analysis toolkit. – **Grant total: \$636k.** <https://xpqlt.com>
- 2022 Principal Investigator (PI) of a proposal selected by NASA Fermi Guest Investigator Program (Cycle 15th) Project Title: Seeking the broad line region of *Fermi*-LAT blazars. – **Grant total: \$70k.**
- 2022 Co-Investigator of a proposal selected by NASA Fermi Guest Investigator Program (Cycle 15th) Project Title: A Search for Dark Matter In Ultra-Dense Black Hole Environments. (PI: Amanda Steinbel) – **Grant total: \$50k.**
- 2022 Co-Investigator of a proposal selected by NASA Fermi Guest Investigator Program (Cycle 15th) Project Title: The *Fermi*-LAT Light Curve Repository (PI: Daniel Kocevski). – **Grant total: \$75k.**
- 2021 Principal Investigator (PI) of a Large (2 years) proposal selected by NASA Fermi Guest Investigator Program (Cycle 14th) Project Title: *Fermi* and the Search for Lost Magnetar Giant Flares. – **Grant total: \$240k.**
- 2021 Co-I of a Regular (1 years) proposal selected by NASA Fermi Guest Investigator Program (Cycle 14th). Project Title: The *Fermi* LAT light curve repository. (PI: Daniel Kocevski). – **Grant total: \$75k**

---

## Honors and Awards

- March. 2026 LSU Alumni Association Rising Faculty Research Award.  
Feb. 2026 LSU's 2025 Prestigious Pathway Award.  
Jul. 2025 EPS HEPP Division's Giuseppe and Vanna Cocconi Prize: to the Fermi-LAT Collaboration.  
[https://indico.in2p3.fr/event/33627/contributions/157725/attachments/93793/144050/EPS\\_HEPP\\_prizes.pdf](https://indico.in2p3.fr/event/33627/contributions/157725/attachments/93793/144050/EPS_HEPP_prizes.pdf)  
Jan. 2024 AAS Bruno Rossi Prize: Weisskopf, Soffitta, and the IXPE team.  
[https://head.aas.org/rossi/rossi.recip.html#2024\\_IXPE](https://head.aas.org/rossi/rossi.recip.html#2024_IXPE)  
April. 2022 Selected postdoc to highlight by NASA-GSFC (NGAPS+).  
<https://science.gsfc.nasa.gov/600/ECSS/Michela-Negro.html>  
Oct. 2021 Selected CRESST II Scientist of the Month.  
[https://cresst2.umd.edu/scientistofmonth/October2021-Negro\\_Michela.pdf](https://cresst2.umd.edu/scientistofmonth/October2021-Negro_Michela.pdf)  
2014 Winner of the ISSNAF-ASI Internship Program for Italian students in the USA (NASA/GSFC).  
2013 Winner of the INFN scholarship at SLAC National Laboratory MenloPark (CA), USA.

---

## Students' success

- 2025-2026 Skye Strain (my undergraduate student): Winner of LaSPACE Undergraduate Research Assistantship (LURA) Program Award with the project on *Physical Classification of Gamma-ray Bursts from Prompt Observations*  
2025-2026 Garrett A. Latiolais (my undergraduate student): Winner of LaSPACE Undergraduate Research Assistantship (LURA) Program Award with the project on *An automated variability monitor and flare advocate system for the future NASA mission COSI*.  
2024 The LSU proposing team: Phong Q Dang, Joseph Henning, Valarie Milton, Austin L Bartunek (I was faculty advisor) – Winners of the open competition for the APS's "PhysicsQuest 2025: Quantum Demos"  
2025 Phong Dang (my mentee, through the LSU APS Chapter): Winner of the Quad fellowship Institute of International Education (IIE)  
2025 Garrett A. Latiolais (my undergraduate student): Winner of the LSU Physics and Astronomy Department's Research Award.  
2025 Nicolò Cibrario (my mentee, through the University of Torino): Winner of the 2025 Fulbright Foreign Scholarship Board (visited LSU for collaboration with my group).  
2024-2025 Garrett A. Latiolais (my undergraduate student): Winner of LaSPACE Undergraduate Research Assistantship (LURA) Program Award with the project on *Deciphering Gamma-ray Blazars Duty Cycle to Inform Polarization Studies with the Future NASA Mission COSI*.

---

## Thesis Committees

- 2023-2025 Doctoral thesis committee member for N. Thompson (LSU, Physics and Astronomy)
- 2025-2026 **Ph.D. advisor (taken over Dr. Greg Guzick) for A. Ficklin (LSU, Physics and Astronomy; expected Ph.D. Summer 2026)**
- 2023-2025 Doctoral thesis committee member for A. Trigg (LSU, Physics and Astronomy)
- 2025-2026 Doctoral dissertation committee member for J. Magneson (LSU, Medical Physics)
- 2025-2026 Doctoral dissertation committee member for L. L. Medlock (LSU, Medical Physics)
- May 2025 Ph.D. defense committee member for N. Rodriguez (Washington University in St. Louis, Department of Physics)
- March 2025 Undergraduate Honors thesis committee member for A. Srivastava (LSU, Computer Science, Honors College)
- 2025-2026 Dean's representative for Ph.D. dissertation committee of X. Tan (LSU, Department of Geology; expected Ph.D. 2026)

### Scientific Selection Committees

- 2025 APS-DAP Cecilia Payne-Gaposchkin Dissertation Award committee Chair
- 2025 APS-DAP Fellows selection committee member
- 2024 APS-DAP Cecilia Payne-Gaposchkin Dissertation Award committee Chair
- 2024 APS-DAP Fellows selection committee member
- 2023 APS-DAP Cecilia Payne-Gaposchkin Dissertation Award committee member

### Press Releases and quotes on contributed works

- 6 Aug 2026 When the Universe does the experiment <https://www.lsu.edu/science/news/science-next/2026/08/vacuum-is-not-empty.php>
- 7 Apr 2026 NASA's Fermi glimpses power source of supercharged supernovae. <https://www.lsu.edu/science/news/2026/05/nasa-fermi-gammaray.php>
- 7 Apr 2023 Historic Nebula Seen Like Never Before With NASA's Imaging X-ray Polarimeter Explorer (IXPE) [https://www.nasa.gov/mission\\_pages/ixpe/feature/nasa-s-ixpe-unveils-crab-nebula-s-magnetic-field-structure](https://www.nasa.gov/mission_pages/ixpe/feature/nasa-s-ixpe-unveils-crab-nebula-s-magnetic-field-structure)
- Mar. 2023 NASA Missions Study What May Be a 1-In-10,000-Year Gamma-ray Burst <https://www.nasa.gov/feature/goddard/2023/nasa-missions-study-what-may-be-a-1-in-10000-year-gamma-ray-burst>
- 15 Mar. 2023 NASA press on the Fermi-LAT Light Curve repository
- Jan. 2023 *NASA/MSFC: IXPE and GBM roles in the observation of the brightest GRB of all times.*
- 28 Mar. 2023 NASA press briefing and release: "NASA Missions Study What May Be a 1-In-10,000-Year Gamma-ray Burst" <https://www.nasa.gov/feature/goddard/2023/nasa-missions-study-what-may-be-a-1-in-10000-year-gamma-ray-burst>
- Jan. 2021 NASA Missions Unmask Magnetar Eruptions in Nearby Galaxies

Dec. 2019 “*Come brilla il lato debole dell’universo*”, INFN Press release (about Michela Negro Ph.D. thesis work on “The unresolved gamma-ray background anisotropies”) <https://home.infn.it/it/comunicati-stampa/comunicati-stampa-2018/3336-come-brilla-il-lato-debole-e-irrisolto-dell-universo-violento>

## Invited Talks

- Aug 2026 46th COSPAR Scientific Assembly - *Overview on indirect observation of Cosmic Rays with the Fermi Large Area Telescope.*
- Aug 2026 46th COSPAR Scientific Assembly - *On high-energy polarimetry with future NASA Mission COSI*
- March 2026 APS Global Summit (Bethe Prize session)- *Multimessenger Astrophysics: An Introduction*
- Nov 2025 TeV Particle Astrophysics (TeVPA) - **Plenary talk:** *Gamma-Ray Astrophysics from Space*
- May 2025 AXIS Mission Science workshop - *AXIS prospects on Magnetar Giant Flare science.*
- Mar. 2025 APS Global Summit - *IXPE Observes Blazars – Review of recent discoveries.*
- Dec. 2024 GRB Mexico 2024 - *GRB Classification with Unsupervised Deep learning*
- Oct. 2024 SuGAR Symposium - *The gamma-ray Galactic diffuse emission*
- Sep. 2024 IXPO symposium - *The IXPE view of the BOAT (GRB 221009A)*
- Aug. 2024 IAU general assembly - *High-energy polarization from gamma-ray burts: a new perspective.*
- Jul. 2024 GRBForum 2024 - *High-energy polarization in GRBs: the IXPE view of GRB 221009A*
- Jul. 2024 European Astronomical Society Annual meeting - *IXPE and COSI synergies to study polarized relativistic jets.*
- Jul. 2024 European Astronomical Society Annual meeting - *The IXPE view of SS 433 X-ray lobe.*
- Jun. 2024 FIGSAG - *Magnetar giant flares and Fast Radio Bursts*
- Jun. 2024 FIGSAG - *The AXIS mission*
- Apr. 2024 AAS-HEAD meeting - *overview of IXPE observations of blazars.*
- March 2024 IPMU Dark Matter workshop - *Dark Matter prospects with the Compton Spectrometer and Imager.*
- Aug. 2023 Dark Matter in the future gamma-ray astronomy (Chicago University) - *Dark Matter prospects with the Compton Spectrometer and Imager*
- Oct. 2022 10th Fermi Symposium - *MeV gamma-ray science with the Compton Spectrometer and Imager (COSI)*
- Jun. 2019 PHOTON 2019 - *Unveiling the gamma-ray background through its anisotropies.*
- Aug. 2019 19th Lomonosov Conference - *Anisotropies in the gamma-ray sky.*
- Aug. 2018 VHEPU, 14th Rencontres du Vietnam - *Unveiling the unresolved Gamma-ray background.*

- Sep. 2018 BAM (Barolo Astroparticle Meeting) - *The power of the unresolved: autocorrelation analysis of the unresolved Gamma-ray background*
- Oct. 2018 8th Fermi Symposium - *Unveiling the unresolved Gamma-ray background.*

## Invited Colloquia / Seminars / Lectures

- Apr. 2026 University of Alabama Huntsville - *The angular power spectrum of the gamma-ray universe and how to study it.*
- Apr. 2026 University of Alabama Huntsville - *The angular power spectrum of the gamma-ray universe and how to study it.*
- Dec. 2025 Mississippi University Ole Miss - *Magnetars fireworks in the time-domain and multimessenger era.*
- Nov. 2025 Michigan Tech - *Magnetars fireworks in the time-domain and multimessenger era.*
- June. 2025 Torino University - *Magnetars fireworks in the time-domain and multimessenger era.*
- Nov. 2025 Invited Lecturer for the Sys2025: Astrostatistics - *Introduction to Machine Learning for data Analysis*
- Dec. 2025 Invited Lecturer for the ASTRAL-X (IAU/COSPAR) X-ray Astronomy School - *X-ray Polarimetry and the IXPE Mission.*
- Feb. 2024 Massachusetts Institute of Technology - *Magnetars fireworks in the time-domain and multimessenger era.*
- May. 2023 Stanford University - *The gamma-ray background: astrophysical sources or dark matter?*
- Nov. 2022 University of Washington in S. Louis - *The gamma-ray background: origin and analyses techniques*
- Oct. 2022 Agenzia Spaziale Italiana (ASI)/Space Science Data Center facility - *What is X-ray polarimetry telling us?*
- Sept. 2022 Los Alamo's National Laboratory - *X-ray polarimetry enabled by the Imaging X-ray Polarimeter Explorer (IXPE)*
- Jun. 2021 Colloquium series @ Physics department of University of Alabama Tuscaloosa - *High-energy transient repeaters: the case of gamma-ray bursts from magnetars.*
- Feb. 2021 Colloquium series @ Physics department of University of Torino - *GRB 200415A: a gamma-ray burst from a magnetar giant flare.*
- Aug. 2020 NASA's Director Seminar - *The unresolved gamma-ray background and the Large Scale Structures.*

## Scientific Leadership and Community Service

### Leadership in Teams and Collaborations

- Since 2024 **GoSoX Team** – The Globe Orbiting Soft X-ray (GOSoX) - PI: Herman Marshall (MIT); Selected in the 2025 NASA Pioneers Mission call. Personal contribution: Co-I and developer of the TDAMM science case on blazars and jetted TDE.

- Since 2022 **COSI Collaboration** – The Compton Spectrometer and Imager is a NASA selected SMEX aimed to survey the soft gamma-ray sky, probe the origins of Galactic positrons, uncover the sites of nucleosynthesis in the Galaxy, perform pioneering studies of gamma-ray polarization and find counterparts to multi-messenger sources. Personal contribution: active member of the Galactic, extragalactic and GRB working groups.
- Since 2015 **IXPE Collaboration** The Imaging X-Ray Polarimetry Explorer is a selected NASA mission that will be launched in Fall, 2021, aimed to explore the polarized radiation between 2 and 8 kilo-electronvolts. Personal contribution: development of the observation simulation software (*ixpeobssim*), event reconstruction with deep learning (still on going), real-data analyses with *ixpeobssim* and other tools.
- Since 2013 **Fermi-LAT Collaboration** (as member) The Large area Telescope is the main instrument on board the NASA's *Fermi* satellite, which has been observing the gamma-ray universe above hundreds of mega electronvolts. Personal contribution: Member of the Publication Board; leader of the *gamma-ray diffuse emission* science group between Fall 2019 and Spring 2021; leader of the anisotropy analysis of the unresolved gamma-ray background (published in 2019); leader of the cross-correlation analysis between extragalactic gamma-rays and neutrinos; Deputy analysis Coordinator for the Fermi-LAT Collaboration effective in March 2024–March 2025; Analysis Coordinator March 2025–March 2026.
- Since 2023 **CALET Collaboration** – The CALorimetric Electron Telescope (CALET) has been collecting cosmic rays and gamma-ray data on the International Space Station since mid-October 2015. Personal contribution: active member of the electrons and gamma-ray working groups.
- Since 2022 **AXIS science team** – The Advanced X-ray Imaging Satellite (AXIS) is a NASA Probe Mission Concept designed to be the premier high angular resolution X-ray mission of 2020s. Currently in NASA's Phase A. Personal contribution: part of the Time Domain and Multimessenger (TDAMM) topical working group, with focus on magnetars transient activities.
- Since 2020 **AMEGO-X team** – The All-sky Medium Energy Gamma-ray Observatory eXplorer, is a NASA-MIDEX mission concept aimed to explore the gamma-ray universe in the mega electronvolt energy range. Personal contribution: logo creator; leading role for the diffuse emission sensitivity simulations; contributor to the instrument performance simulations.
- Since 2019 **AstroPix Team** – The silicon pixel sensors in AstroPix –still in development and testing at NASA/GSFC– is the space version of the ATLAS pixel detector. Personal contribution: leading role on the simulations campaign to optimize the ATLASpix design to space-based mission detectors.
- Since 2019 **AMEGO (probe) team** –The All-sky Medium Energy Gamma-ray Observatory, is a NASA mission concept aimed to explore the gamma-ray universe in the mega-eV energy range. Personal contribution: instrument simulations of the AMEGO prototype (ComPair).

Scientific community Service

- Mar. 2025 Served as reviewer for PhD projects submitted to Università Italo Francese (UIF)'s funding opportunity.
- Jan. 2024 APS Congressional Visit Day (representative for Louisiana).
- Since 2023 Served in several NASA's Mission Opportunity proposal review panels.
- Since 2020 Served as reviewer for several peer-reviewed journals: Astrophysical Journal, Astrophysical Journal Letters, Nature Astronomy, and other.

### Scientific Events/Conferences and Projects Organization

- 2026 *Organizer*, 2026 Spring Fermi-LAT Collaboration Meeting
- 2025 *SOC member*, 4th TDAMM workshop.
- 2024 *SOC member*, Chandra @ 25 years Conference.
- 2024 *SOC member*, 11th Fermi Symposium
- 2024 *SOC member*, 3rd TDAMM workshop.
- 2024 *SOC member*, NICER-IXPE workshop.
- 2021 *Convener*, TAUP2021 international conference
- 2018 *LOC Member* The 3C Extragalactic Radio Sky: Legacy of the third Cambridge Catalogue, international conference
- 2017 *LOC Member* Half a Century of Blazars and Beyond, international conference
- 2015, 2016, 2017 Member of the LOC and speaker for the 1st, 2nd and 3rd edition of the *Fermi* Masterclass, Torino, Italy

### Graduated students

- Aug 2026 **Anthony Ficklin** *Thesis* Extreme Geomagnetic Storm effects on Earth's Radiation Belts observed by CALET on the ISS. (Co-supervised with Greg Guzik).

### Mentoring Experience

- Spring 2026 **Training:** Attended the mentor training workshop offered by the LSU Facilitators for Advancing Mentoring Excellence.
- Since 2020 **Organizing Committee:** *Fermi* Mentoring Program Personal contribution: meeting/training organization, mentor-mentee matching.
- Postdocs Adrien Picquenot (LSU), Vikas Chand (LSU)
- Graduate Students Anthony Ficklin (LSU, graduated in Aug 2026); Phong Dang (through APS Chapter, LSU, current); Jordan Stanly (LSU, current); Mohammad Ali Boroumand (LSU, current), Garrett Latiolais (LSU, current)
- Undergrads Auto Breaux (LSU/Tulane), Skye Strain (LSU), Jayden Jeter (LSU).
- Since 2020 Mentee Nicolás Cibrario - Ph.D. student (now INFN researcher) at University of Torino.
- 2019/2023 Mentee Milena Crnogorčević - while Graduate student at UMD/NASA-GSFC (now Marie Curie fellow at University of Amsterdam).

### Teaching Experience and Training

- Fall 2026 *Training:* attended the C-I (Communication Intensive) Teaching Lab organized by LSU.
- Fall 2026 ASTR 1301 (Honors course + Communication Intensive Course) Department of Physics and Astronomy, LSU
- Fall 2025 PHYS 7895 - Machine Learning for scientific data analysis - Department of Physics and Astronomy, LSU
- Fall/Spring 2023, 2025, 2026 ASTR 1101 - Department of Physics and Astronomy, LSU
- 16-18 Jun. 2020 Python for Gamma-ray Lab Bootcamp, NASA Goddard Space Flight Center (Greenbelt), USA
- 18-20 Jul. 2017 9 hours course on “Universo Visibile e Universo Oscuro” (The dark and the visible Universe) to high school students at Campus MFS 2017, Bardonecchia (Torino), Italy
- 2017 (first semester) Teaching assistant at Electromagnetism course at University of Torino, Physics department, Italy
- 2016 (first semester) Teaching assistant at Electromagnetism course at University of Torino, Physics department, Italy
- Since 2013 A total of 10 students individual tutoring for several Physics courses at different levels of preparation (from high-school to graduate students).

## Outreach Activities

- 15 Feb. 2025 *Kids' Day at the Museum* - Chat Leader
- 2 Nov. 2024 *Saturday Science Baton Rouge* : “A journey through the invisible Universe”.
- 5 Feb. 2024 *Playing with science at Bayou Wood Elementary school* : “Astronomy in the Multimessenger Era”.
- Dic 2023 *"Hear From Experts" for the NASA's AstroPhoto Challenge 2023: the Crab Nebula* [https://www.youtube.com/watch?v=EvjLi\\_QUfGw&t=16s](https://www.youtube.com/watch?v=EvjLi_QUfGw&t=16s)
- 15 Sep. 2023 *Astronomy On Tap* : “Celebrating 15 years of the NASA's Fermi mission”.
- 18 Jun. 2021 *Wyoming Stargazing* public talk: “What do telescopes look like in the era of multi-messenger Astrophysics?”. [https://www.jhnewsandguide.com/scene/events/particle-physics-meets-astronomy/article\\_16cda28e-da30-570c-a38c-7bdc5bb60c33.html](https://www.jhnewsandguide.com/scene/events/particle-physics-meets-astronomy/article_16cda28e-da30-570c-a38c-7bdc5bb60c33.html)
- 19 Feb. 2018 *Study and reseach experiences at the Univiersity*— organized event for high-school students planning on their future. <https://convegno19febbraio2018.wordpress.com/tag/scienza/>
- 2018 – 2020 *2nd Edition Art&Science across Italy - Torino*. MN is member of the Local working group and lecturer <https://artandscience.infn.it/en/the-team/>.
- Dec. 2017 *Fermi* Masterclass, Torino, Italy. MN is one of the organizers and a lecturer.
- Sep. 2017 European Researchers' Night (Torino) - *Verso l'infinito... per andare oltre! (Towards the infinity... to go beyond!)*. MN interacts with the public to explain and do the proposed activities.
- Dec. 2016 *Fermi* Masterclass, Torino, Italy. MN is one of the organizers and a lecturer.

- Sep. 2016 European Researchers' Night (Torino) - *physics4society* - *The impact of the discovery due to researchers activities in everyday life*. MN interacts with the public to explain and do the proposed activities.
- May 2016 "Pint of Science" public talk (Torino downtown).
- Dec. 2015 *Fermi* Masterclass, Torino, Italy. MN is one of the organizers and a lecturer.
